End of First Semester Examination - 2019/2020

INF213: Web Technologies I

Duration: 2 hours

Instruction:

Answer ALL Questions in the answer booklet provided.

Answer ALL Question from Section A for (30 marks) and select TWO (2) questions from Section B (30 marks)

SECTION A

Answer ALL Questions inside this booklet; each question carries TWO Marks.

1- Write HTML5 code to create an ordered list with 2 items, **apples** and **bananas**.

2- Demonstrate how to link "**style.css**" file in html document.

3- Explain the difference between browser and web server. Give example of each.

4- Write the code to embed external DTD, "**order.dtd**" file into an XML document.

5- What is a CSS as used in web design and briefly explain why it is important in Web design?

6- Specify the code you would enter to display the text "**Product List**" as a second level heading, centered horizontally on the page.

7- Write the correct DTD to specify attributes '**nr**' and '**lang**' for element '**Article**'?

8- Valid XML document means

9- Specify the code you would enter to mark the text **"Hamlet by William Shakespeare"** as a centered h1 heading with a line break after the word "Hamlet."

10- You want to add the graphic file, "**portrait.gif**" to your Web page as an inline image. For nonvisual browsers, your page should display the text **"David Vinet"** in place of the image. Specify the code to do this.

11- Well-formed XML document means.

12- What is an embedded/document level style sheet in HTML documents? Illustrate with an example code.

13- An inline image has the id photoImage. Specify the style declaration you would enter to move this inline image on the left margin. Also to set the size of the image to 200 pixels wide by 100 pixels high?

14- Write the HTML tag and code for a Submit button with the label "**Assignment**" on it.

15- Specify the code to set the text color of every paragraph element within the Web page to red.

SECTION B
